The Solution: Foundation for Patient Powered Solutions

The purpose of the Foundation for Patient Powered Solutions is to create a “social enterprise” to execute on three primary goals:

- 1 Deploy a shared enterprise solution that will empower patient advocacy organizations to share in the creation and operation of a linked research and patient engagement platform (Patient Powered Solution Network or PPSN) for the purposes of enabling cross-disease research as a means to accelerating therapeutic advances and cures
- 2 To create and deploy services and technologies that will inform, educate, empower, and engage each PPSN community's members to drive enhanced care, improved quality of life and meaningful outcomes
- 3 To create and deploy commercial products and services that will generate sustained revenues which will be used to support the missions of the Patient Powered Solution Network members

PATIENT POWERED SOLUTIONS NETWORK

MARKET
