National Health Council Governance Structure

Overview of NHC's Public Policy-Making Process

The NHC's public policy agenda is set by its **Board of Directors**. A standing policy committee is tasked with developing goals, which are reviewed and approved by the full Board.

Multi-stakeholder **Action Teams** explore policy goals in depth, recommend operational strategies, and define success metrics. NHC staff and Policy Action Team report on success metrics to Policy Committee.

Board Policy Committee Charter

Policy Committee Purpose:

The National Health Council's (NHC) Policy Committee is tasked with setting the NHC's policy goals.

Membership:

The committee shall reflect the diversity of the National Health Council's member organization. Emphasis is placed on including members of the Board of Directors. However, when needed, non-Board members shall be included in order to ensure adequate diversity.

Authority and Responsibilities:

The committee meets regularly to monitor the policy landscape and set or adjust NHC policy goals.

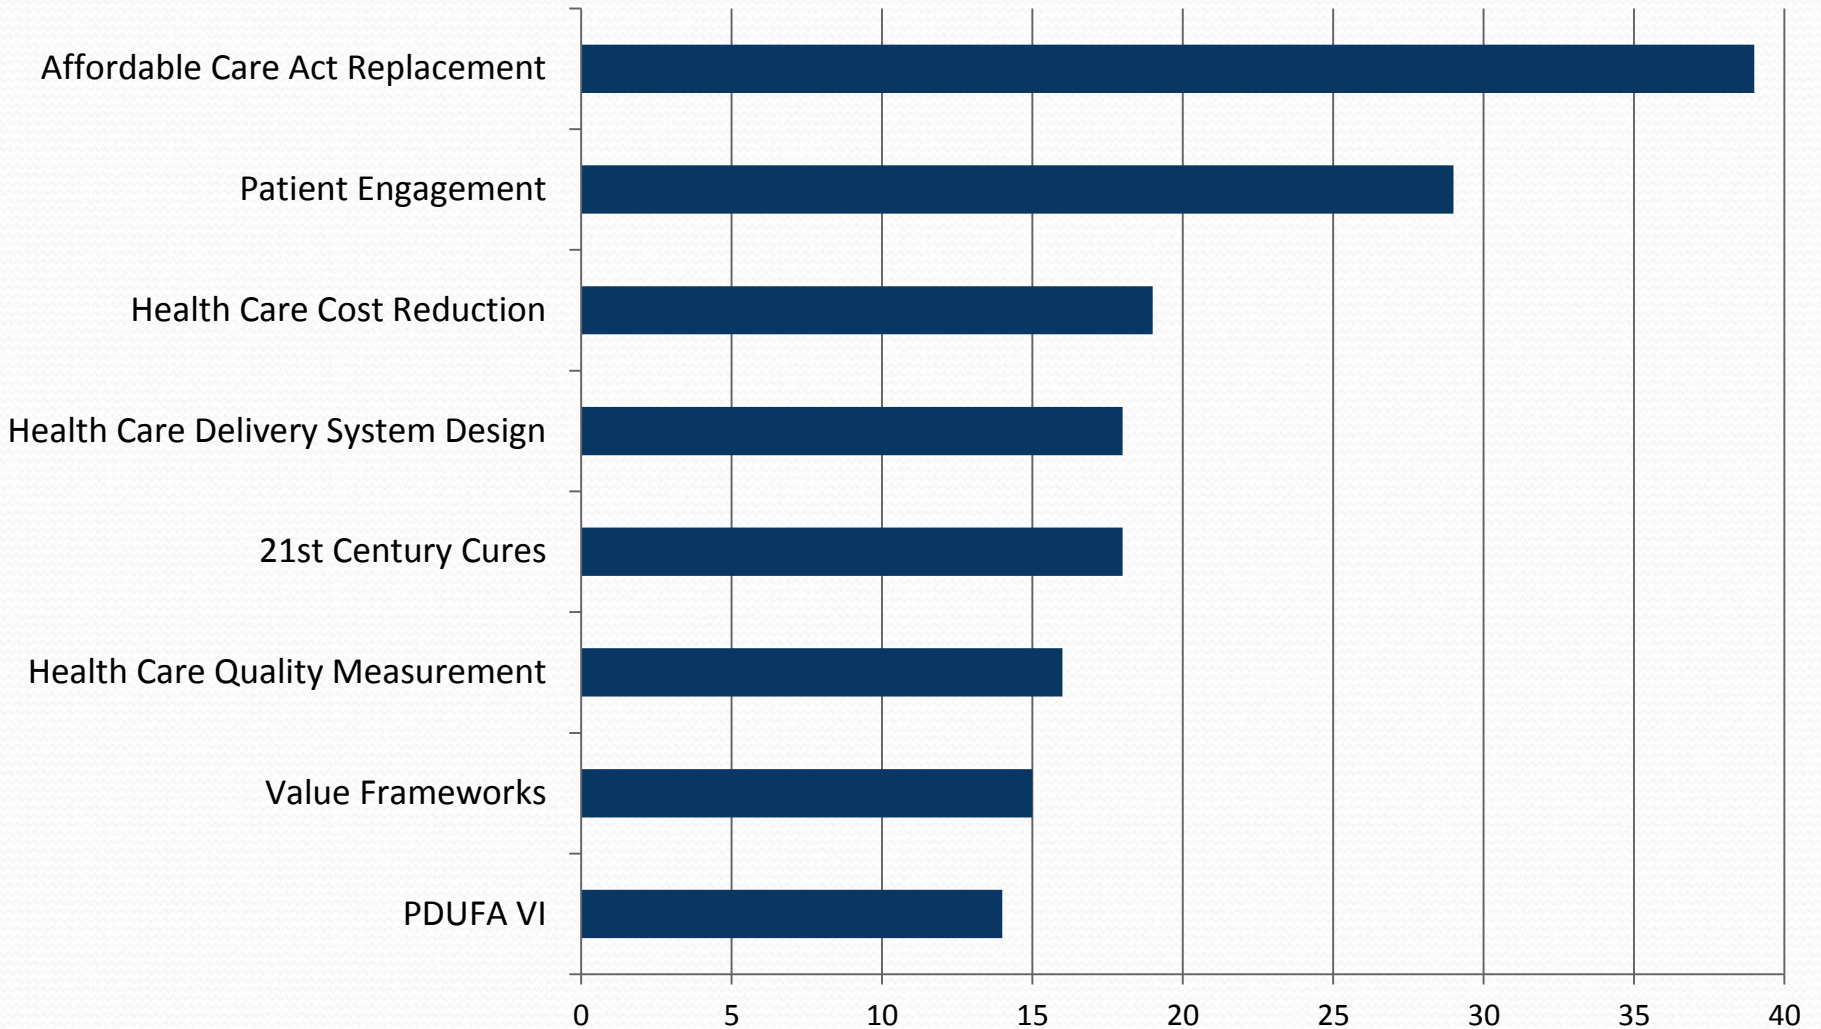

Logistics:

- The committee chair shall preside at all meetings.
- Meetings may be in person or telephonic.
- The committee shall meet quarterly.
- Between regularly scheduled meetings, committee members may be called upon to respond to emerging policy topics that need timely response, either by email or ad hoc telephone calls.
- The committee chair reports to the full Board of Directors at its quarterly meetings.
